ELSEVIER

Int. J. Production Economics 43 (1996) 305–306

international journal of
production
economics

Contents Volume 43

Vol. 43, No. 1

Aggregate planning with continuous time
I. Dobos 1
A technical note on using work sampling to estimate the effort on activities under activity based costing
W.-H. Tsai 11
Performance modeling of multistage production systems operating under hybrid push/pull control
P.C. Pandey and P. Khokhajaikiat 17
Due-date assignment and single machine scheduling with compressible processing times
T.C.E. Cheng, C. Oğuz and X.D. Qi 29
Improving buyer-seller system cooperation through inventory control
S.X. Li, Z. Huang and A. Ashley 37
Modelling resource supply and demand: Expanding the utility of ABC
C. Salafatinos 47
Multicriterial production planning by De Novo programming approach
Z. Babic and I. Pavic 59
Linking profits to Greek bank production management
D. Vasiliou 67
Diary of Events 75

Vol. 43, Nos. 2,3

A tabu search heuristic for the multiprocessor scheduling problem with sequence dependent setup times
P.M. França, M. Gendreau, G. Laporte and F.M. Müller 79
A fuzzy pooling of investment cost knowledge
M. Dohnal and D.M. Fraser 91
Due-date assignment and single machine scheduling with compressible processing times
T.C.E. Cheng, C. Oğuz and X.D. Qi 107
Performance modeling of multistage production systems operating under hybrid push/pull control
P.C. Pandey and P. Khokhajaikiat 115
Batching in production planning for flexible manufacturing systems
B. Srivastava and W.-H. Chen 127
An efficient heuristic procedure for the single-item, discrete lot sizing problem
C. Canel, B.M. Khumawala and J.S. Law 139
Batching policies for linearly increasing demand with a finite input rate
R.M. Hill 149
What difference does your industry make?
D. Hamblin and A. Iyer 155
A hybrid econometric–neural network modeling approach for sales forecasting
J.T. Luxhøj, J.O. Riis and B. Stensballe 175
Evaluation of corporate environmental management approaches: A framework and application
G. Vastag, S. Kerekes and D.A. Rondinelli 193

0925-5273/96/$15.00 Copyright © 1996 Elsevier Science B.V. All rights reserved

Component kitting in semi-automated printed circuit board assembly
H.O. Günther, M. Gronalt and F. Piller 213
Corporate control of investments and management styles
E. Segelod 227
Human-resource-based models of production systems
P.S. Hempel 239
The practice of production control techniques in the manufacturing sectors in the Eastern Province of Saudi Arabia
A. Andijani and S. Selim 251
The first step in planning group technology
J.L. Burbidge 261
Learning-induced control model to allocate managerial resources for production technology development
B. Kim 267
A comment on Martin's: Note on an EOQ model with a temporary sale price
S.K. Goyal 283
Recent research on public pension systems. A Review
J.H. Petersen 285
Diary of Events 299
